🐙 PY-SENSEI

## WORK EXPERIENCE

---

### Soltaire Infosystem

Developer Intern

Jun-2023 - Dec-2023

- Reduce the backend API routing time consumption upto 5%.

## EDUCATION

---

BTECH/ CSE

SEPT 2020 to JULY 2024

## PROJECT

---

### 1. STORE-IT

- A complex Google Store replacement that helps you store data and download them as needed.
- Fluid and sharp loading time.
- easily manageable

### 2. UNLINKED

- A better version of Linkedin with features such as connecting to others and real-time adding and removing connection feature.
- Easy connections with likes and post features.

### 3. SWIPE-IT(Tinder clone)

- A simple swipe can make you meet your partner. Some might say it's a Tinder Clone.
- The fast API and react-swipe feature.
- quick and effective runtime

## SKILLS
